

REPI-144-21

A system or assembly of exterior wall components, including exterior wall finish materials, that provides protection of the building structural members, including framing and sheathing materials, and conditioned interior space, from the detrimental effects of the exterior environment.

~~R502.3.4~~ R502.3.5. Additions shall comply with Sections R502.3.1 through

shall comply with Section R506

_____ shall comply with Section R506
where the _____ contains two or more of the following:

1. HVAC unitary systems or HVAC central heating or cooling equipment serving the _____ area.
2. Water heating equipment serving the _____
3. 50% or more of the lighting fixtures in the _____ area.
4. 50% or more of the area of interior surfaces in the alteration area
5. 50% or more of the area of the _____

- _____
1. _____ that are permitted with an addition complying with section R502.3.5.
 2. _____ that comply with Section R405 or R406.

Where required in Section R502 or R503, the

replacements did not include additional equipment. Conversely, an alteration might be considered Level 3 because it includes substantial alterations to egress paths but include only minimal impacts to energy systems.
